Results 1 - 3 of 3 short listing

- 1** Technical communications as knowledge management: evolution of a profession 13%

Patti Anklam

**Proceedings of the 17th annual international conference on Computer documentation** October 1999

The tasks, talents, and technical capabilities of systems communications professionals have evolved over the past 30 years as the industry itself has grown and transformed the world we live in through several generations of systems. The next generation of systems will be focused on supporting the knowledge worker more effectively and efficiently by focusing on knowledge-enabling business processes. The skills, practices, and understanding of the community of systems documentation profession ...
- 2** Document management and Web technologies: Alice marries the Mad Hatter 6%

V. Balasubramanian , Alf Bashian

**Communications of the ACM** July 1998

Volume 41 Issue 7
- 3** Declarative specification of Web sites with S 4%

Mary Fernández , Daniela Florescu , Alon Levy , Dan Suciu

**The VLDB Journal – The International Journal on Very Large Data Bases** March 2000

Volume 9 Issue 1

S is a system for implementing *data-intensive* Web sites, which typically integrate information from multiple data sources and have complex structure. S's key idea is separating the management of a Web site's data, the specification of its content and structure, and the visual representation of its pages. S provides a declarative *query language* for specifying a site's content and structure, and a simple *template language*
